*Premium Online Roadmap includes both basic and premium sites

Student Access provides access to only student instructional materials

Teacher Access provides access to all instructional materials for both the student and the teacher

What is the difference between the Roadmap and Premium Roadmap? Which do I need?

The Roadmap includes the text and the curriculum. It includes the study materials for students and the teacher's version includes lesson plans, assessments, teaching strategies, and much more. The Premium Roadmap can be considered the story with enhanced media. It includes a section titled "Ask Team HOPE," options for students to submit their own essays, plays, and other activities, the audio books, Kindle and Sony downloads, and much more. Both the Roadmap and Premium have the online digital book included. We recommend that all students and teachers get the Roadmap as a minimum. The Premium Roadmap offers a unique enrichment for all learners that completes the package of offerings.

What are the differences between Student and Teacher views?

Teacher views include hundreds of lessons, assessments, Teacher Toolkit, and other resources to assist teachers with instruction. Generally, these are items designed only for teachers. Student views focus on such things as key historical points, critical events, primary sources, laws, and vocabulary. Teachers have access to both the student view and the teacher view with the teacher password.
